## Specifications

<b>General Information</b>	
Throughput	Up to 120 tests/hour
Time to first result	13 minutes
Detection principle	Magnetic particle-based direct Chemiluminescence
Chemiluminescence label	Acridinium Ester
<b>Sample Supply System</b>	
Sample position	16 sample positions with STAT function
Sample tube	Microcup and blood collecting tube
Sample volume	5-150 μL
Reaction vessels loader capacity	500 reaction vessels reserve for continuous loading
<b>Reagent System</b>	
Reagent position	15 positions with on-board refrigeration
Reagent carousel temperature	2-8°C
Reagent detection	Reagent level tracking
Reagent pack	2 x 50 tests per kit
Auto dilution	Maximum of 1:400 (for valid test)
<b>Reaction Carousel</b>	
Capacity	48 reaction vessels
Incubation temperature	37.0°C ± 0.3°C
Mixing system	Non-contact eccentric vortex mixer
<b>Operating Conditions</b>	
Power supply	100-240 V, 50/60 Hz
Power consumption	600 VA
Temperature	10-30°C
Ambient humidity	20%-85% RH (without condensation)
Atmospheric pressure	61.6 kPa-106.0 kPa
Dimensions	930 * 710 * 650mm (L*W*H)
Weight	120 kg

## iFlash I200

### Chemiluminescence Immunoassay Analyzer

# iFlash 1200

## Chemiluminescence Immunoassay Analyzer

### Embrace CLIA Today

iFlash 1200 is the newly-joined member of the iFlash family, offering an unparalleled workstation to the low-mid volume testing laboratories, especially with limited floor space. Like the other members of the iFlash family, it shares the same product assortment.

Moreover, iFlash 1200 offers an extensive and expanding immunoassay test menu including autoimmunity, infection, reproductive health, and routine panels.

**iFlash 1200, an easy-to-use and automated instrument, commits to meet the demands of higher efficiency and less cost.**

## Intelligent

Predictable results delivery time  
Reflex, auto-dilution, and auto rerun function

## Flexible

Calibrators are included in the kits  
A broader assay menu requires less outsourcing

## Liberate

Automated RV (reaction vessels) loading  
Continuous reagent and sample loading

## Accurate

Stable system temperature control  
Non-contact vortex mixer minimize carry-over

## Smaller

Consolidation (120 parameters) meets compact size

## Harmonious

Reagents and consumables are compatible  
with the iFlash series

**iFlash 1200 is designed to meet the various users' needs.**

Dedicated analyzer  
for unique parameters

Special testing panels  
for mid-volume testing labs

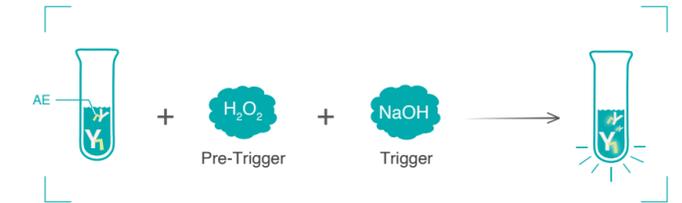

Primary analyzer for the  
labs with space limitation

**iFlash 1200 uses advanced acridinium ester-labeled chemiluminescence technology.**

For chemiluminescence systems, acridinium ester (AE) tends to be relatively simple with a smaller size compared to other labels. It can emit light directly in alkaline-hydrogen peroxide solution without the need for enhancers or catalysts. The application of chemiluminescence immunoassay provides lots of advantages, including:

- Low background noise
- High signal-to-noise ratio
- Few interferences in the reaction
- More stable labelling process
- High luminous efficiency & intensity

Emission light intensity reaches the maximum in seconds.
